

one pager

A dark, metallic, futuristic device with a curved screen. The screen displays the text "THE RACE IS ON..." in a dotted font, where each letter is composed of a grid of white dots.

THE RACE IS ON...

one pager

for the

WORLD

one pager

A black and white photograph showing the interior of a hyperloop pod. The interior walls are dark, and the floor is a light-colored material. In the center, there is a seat or platform. The background shows the tunnel ahead, which is dark and curved. The overall atmosphere is futuristic and minimalist.

for the

rLoop

rLoop is delivering the vision of the Hyperloop.
You too can be part of the engineering revolution.

For three years, we've created the world's top Hyperloop technology as a decentralised team.

Now we are bringing the Hyperloop onto the Blockchain, allowing you to own it and be
part of the future today.

Be in the loop and join our email community.

rLoop Coin

The rCoin is the currency to power our network of minds and deliver our projects. The first project is in delivering the future of transportation, the Hyperloop.

#teamoftomorrow

“rLoop is the first engineering organisation on the Blockchain. We are the inventors, the risk takers, the game changers, the reality breakers. Together we have become a team of **over 1,200 members** from more than **56 countries**. United by a desire to be part of world-changing technology. We are the team of tomorrow” - rLoop

We are the experts from NASA, CERN, Tesla, GE, Honeywell, and dozens of other top technology companies, all on a journey where the impossible become possible.

#theraceison

“The Hyperloop is a new way to connect, it's as convenient as a train and faster than a plane” - rLoop

The Hyperloop is the future of transportation.

Imagine a world where there are no weather delays, no check in, no flight delays and no traffic jams or long commutes.

Technologically all of this is possible.
The future is here - the race is on.

“Ethically as well as practically, the Blockchain allows everyone to invest and be part of the future. The Hyperloop owned by the people is the purest manifestation of our beliefs, values and capabilities.” – rLoop

rLoop is delivering the Hyperloop. It's now time for rLoop to grow and be owned by the people. By bringing the Hyperloop onto the Blockchain you have a chance to be part of it.

rNetwork of minds

“When millions of people’s untapped talent has a place to go, the results are incredible. rLoop plans to harness the crowd to change the world.” – rLoop

one pager

There are two primary innovations that the rLoop provides: the approach to developing a project, and the processes to facilitate network collaboration. This is what we call rNetwork – the rLoop Network.

+

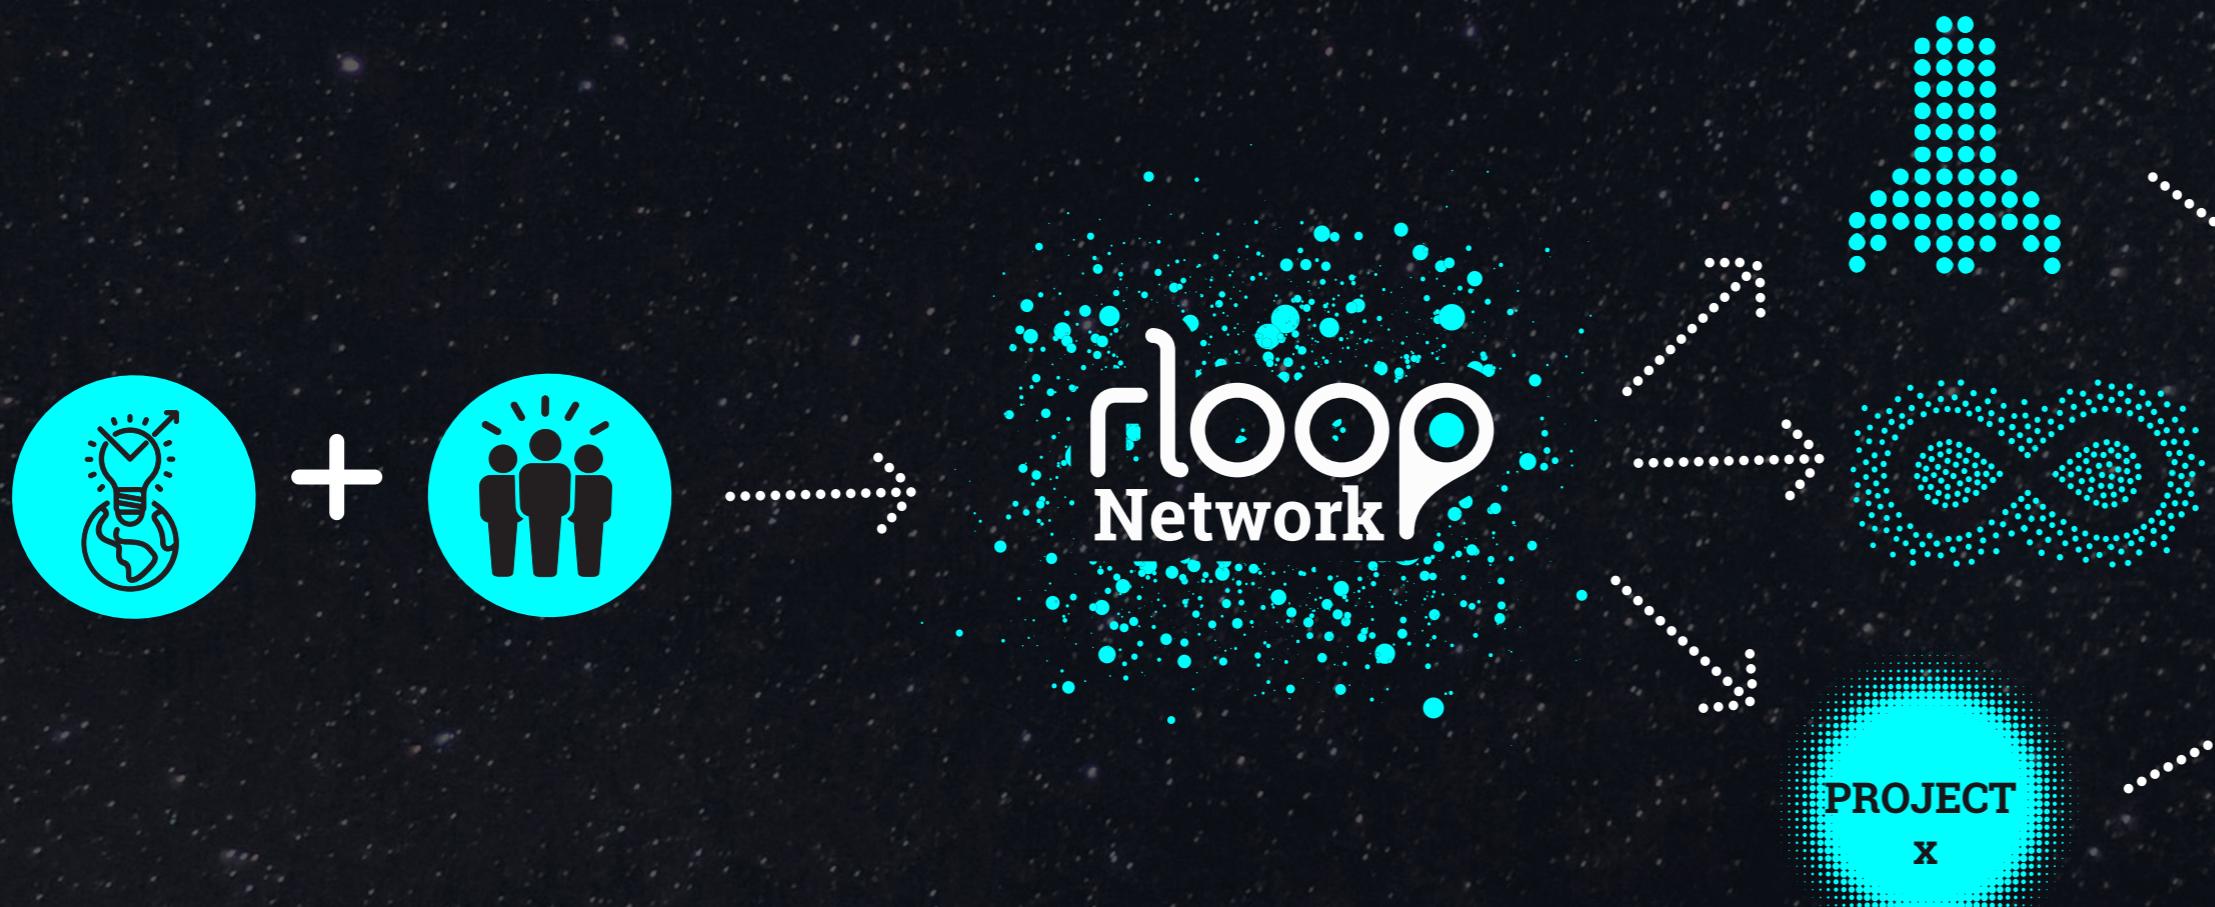

rloop
Network

one pager

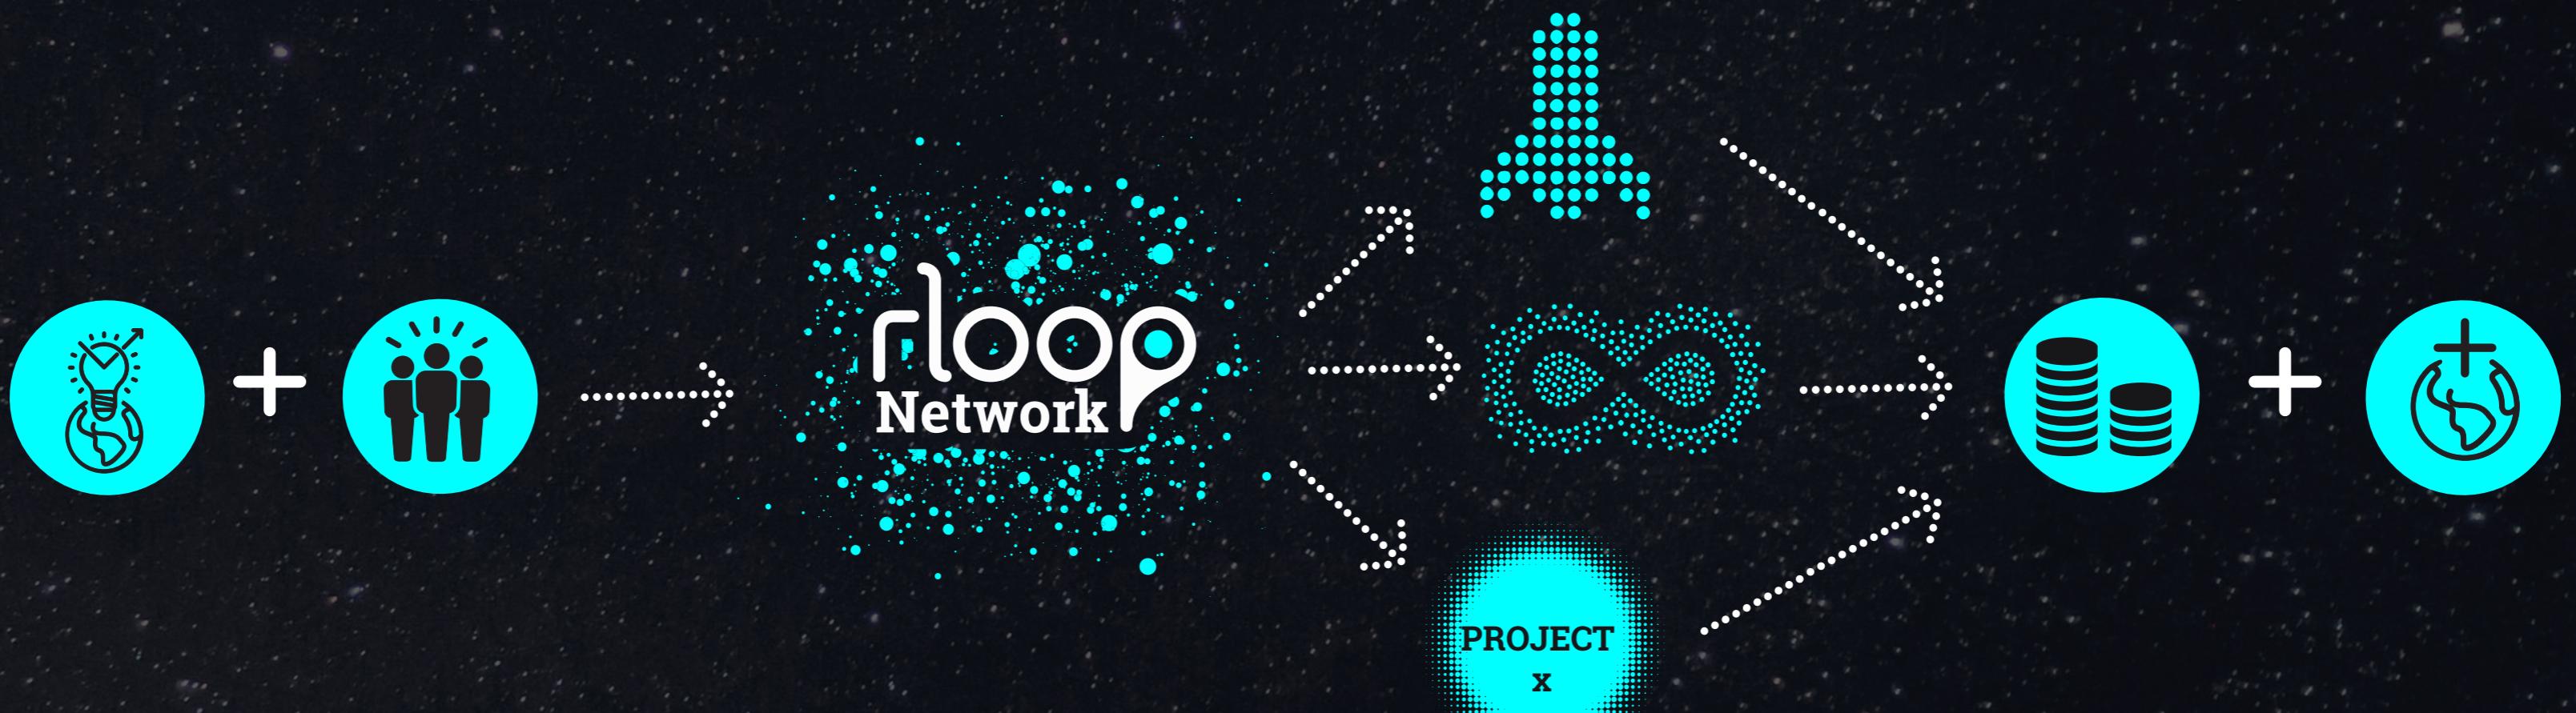

By freeing society from the bottle neck that has hampered technological advancement it enables people to collaborate and provide service wherever they are on the globe. Together, operating under the rLoop values they will develop innovative technology that can have a global impact.

one pager

The ROI comes from selling the project outputs to governments and education as well as positively contributing to a better world.

#teamoftomorrow

In June 2015 Elon Musk, CEO of SpaceX announced a competition for engineering teams to design a pod for the Hyperloop and have it tested on a track at SpaceX.

Within hours of the competition announcement a post on Reddit encouraged the community to form a team to compete. The team began to grow as strangers came together with a shared vision to make the dream a reality. In an experiment of open collaboration the world's first crowdsourced engineering team was born: rLoop. The team grew organically through social media. Meeting daily using online tools like Slack and Google Hangouts. Visions and concepts thrived in a non-hierarchical structure, while a lack of organisational obstacles enabled rapid progress.

For three years, we've created the world's top Hyperloop technology as a decentralised team. Our journey so far...

- Worlds first most advanced Hyperloop prototype to date
- First Pod to achieve static levitation in vacuum
- First pod to demonstrate pressure vessel sustaining human life in vacuum
- First engineering system entirely designed and built by the crowd
- Award winners:
 - "Best Non-Student Hyperloop Design" from Elon Musk, SpaceX at the World's First Hyperloop Design Competition
 - "Best Hyperloop Design, Drama, and Excitement: Best Architectural Design and Presentation" from BuildEarthLive, Asite, and the Dubai Future Foundation
 - "Next Big Thing" from Basware and IndieGoGo
 - "Innovation Award" from SpaceX at the World's First Hyperloop Pod Competition

The future of work

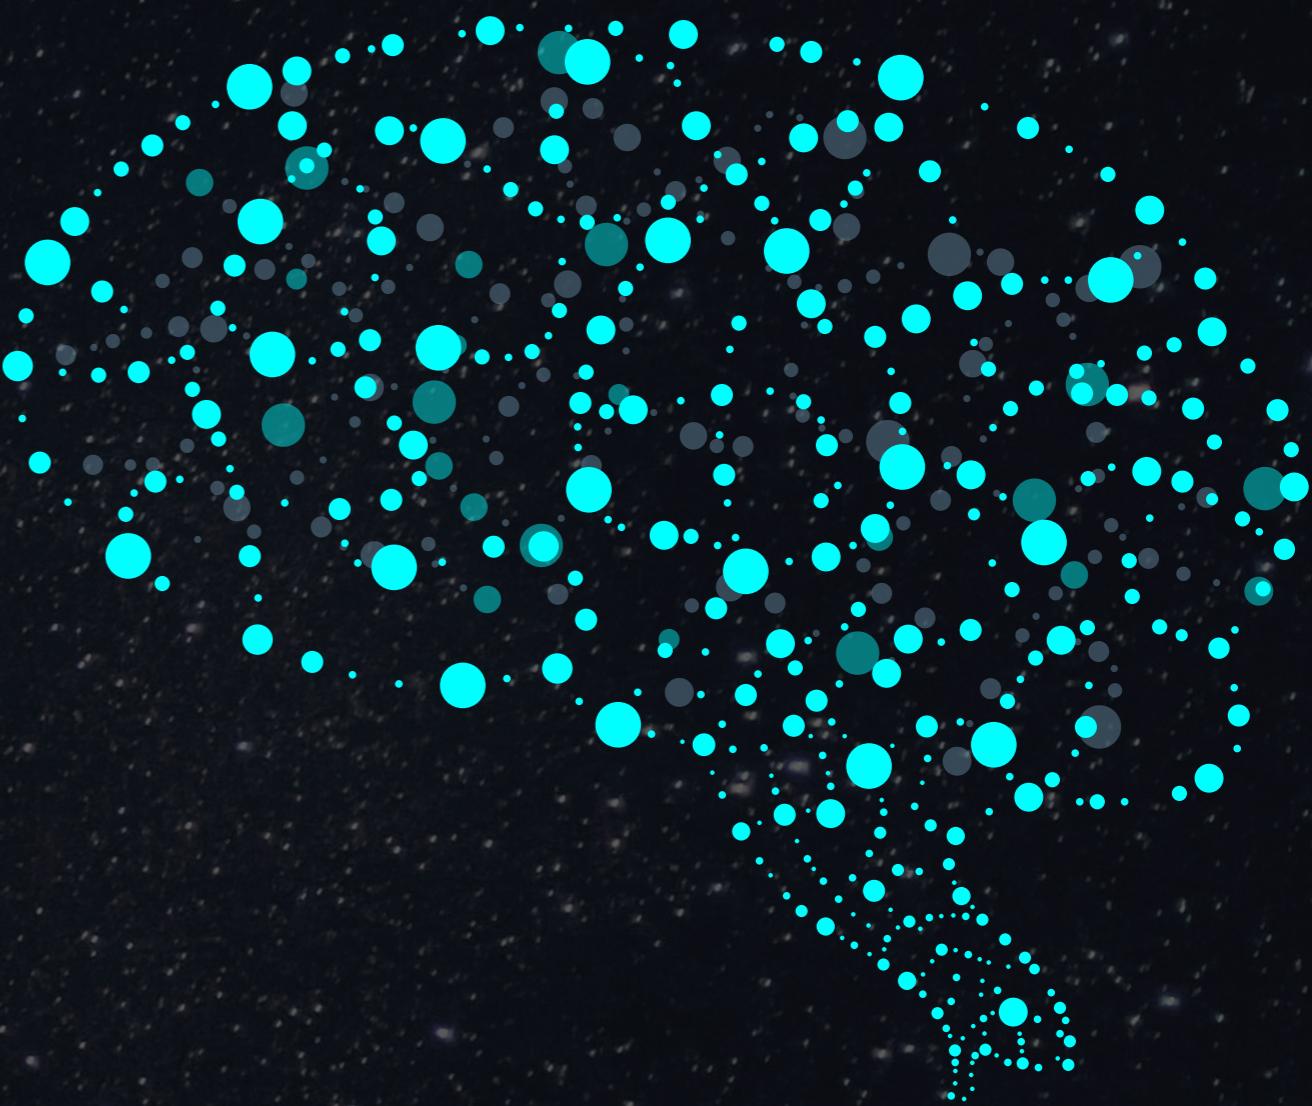

"When millions of people's untapped talent has a place to go, the results are incredible. rLoop plans to harness the crowd to change the world." - rLoop

rLoop is not only delivering a new way to travel, we are demonstrating a new way to work.

rLoop has shown that there is a better way of doing business, of collaborating and providing services. It offers vital lessons in how we can shape the future. How we can contribute to our global society and its destiny together. United and sharing power for common purpose.

rLoop has shown that there is a vast untapped workforce of talented and diverse people who are eager to participate in developing innovative technology that can have global impact.

rPartners

“We believe that our vision, values and principles can create the momentum to drive radical change to realise the future of transportation and connect the world as never before.” - rLoop

With thanks to our trusted partners who have supported our journey and are united by the desire to be part of a world changing technology...

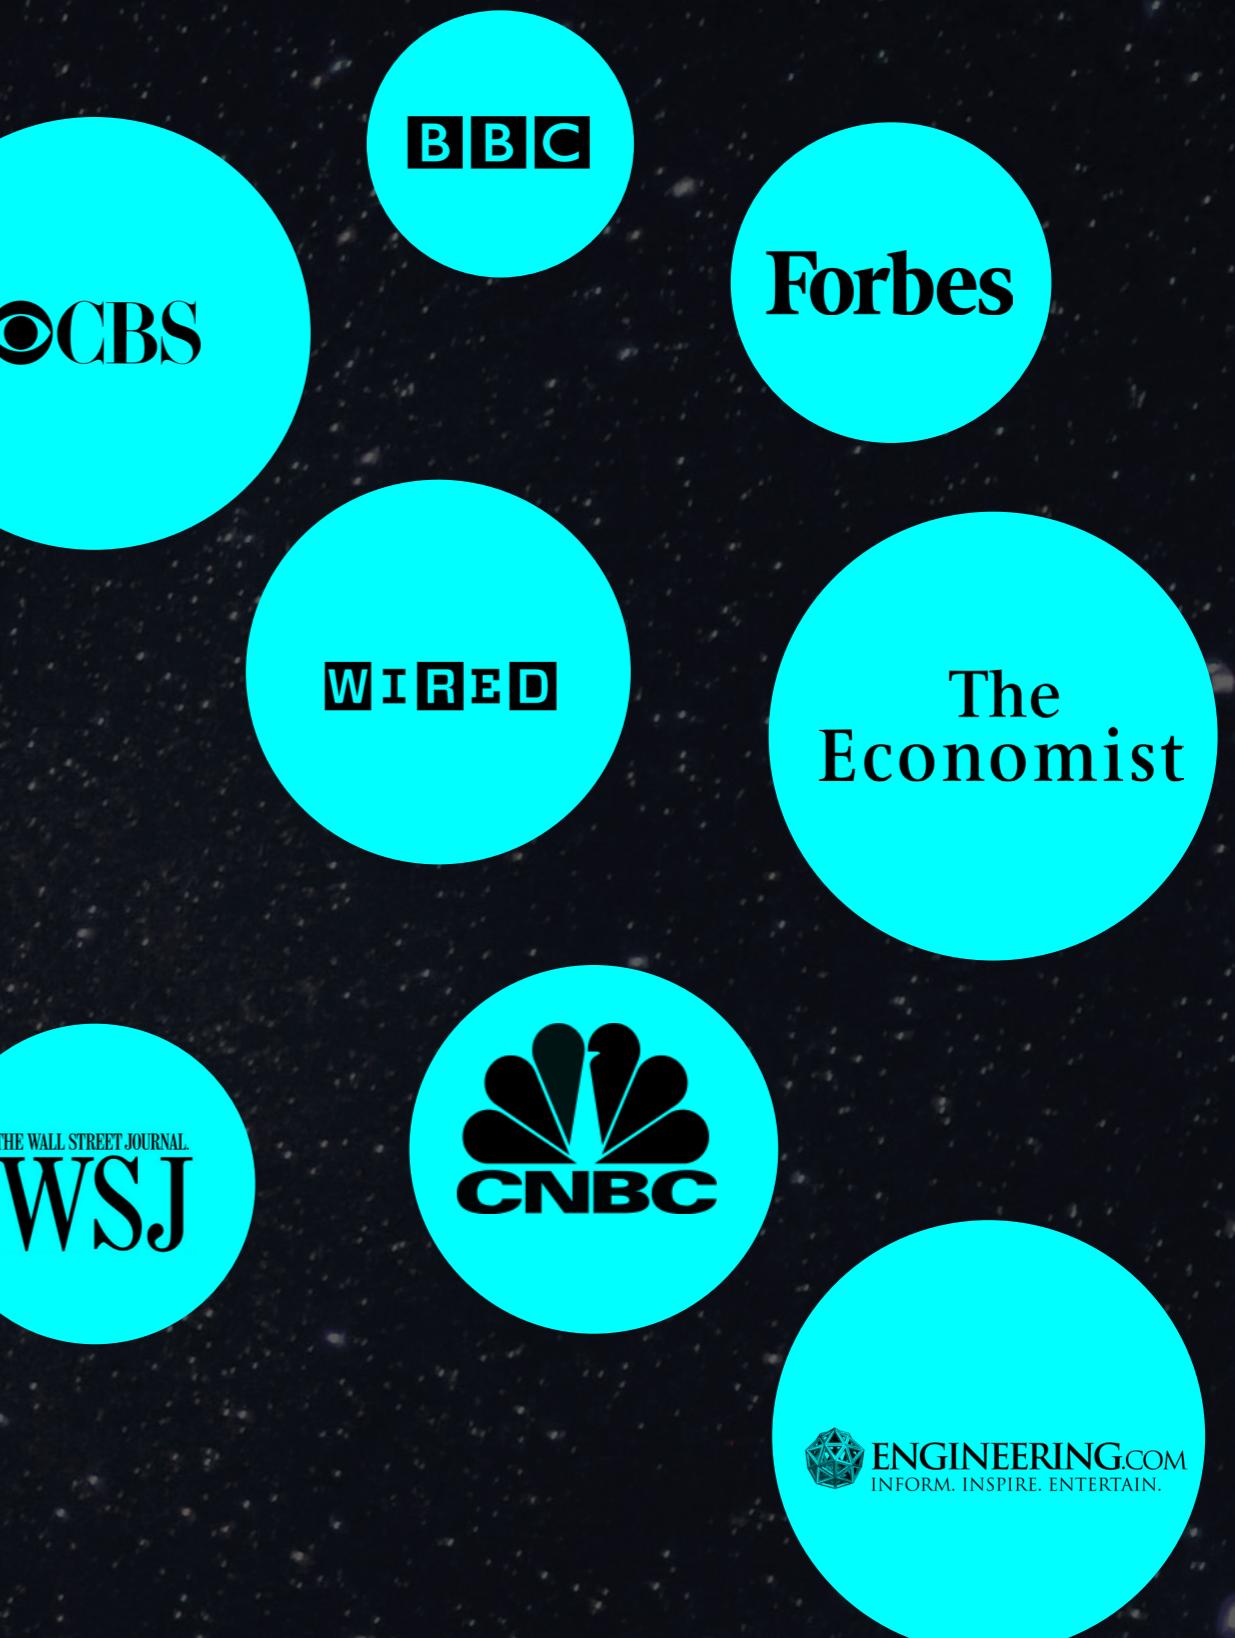

rNews

“rLoop is a global movement with the ambition and appetite to change the world. We are united by a shared goal of radical technological breakthroughs for the benefit of humanity.” - rLoop

Our success to date has been driven from the experiences, ideas and passion of our members who have over the last few years put their time and effort into our journey. This journey has received extensive media interest.
